

# STARTING SCHOOL IN 2021

## ENROLMENTS FOR 2021 ARE INVITED

The early years of school are an important part of a student's lifelong educational journey. We believe that giving students an effective introduction to school provides them with a positive head start and strong foundation to build upon in future years.

The transition to school starts in the year before the child actually commences at Rowville Primary School. They participate in specialist classes and this assists them to get to know other children, the teachers and the school environment. These sessions are multi-sensory and play based. Transition at Rowville Primary School is more a process that includes having fun, learning and developing a range of skills so that by the time children actually start school they are familiar with their environment and feeling very excited to be taking that next step.

From their very first day at Rowville Primary School, students see themselves as high achievers. They are authors, readers, mathematicians and inquirers. The explicit teaching model of instruction at Rowville Primary School is underpinned by the latest educational research.

At Rowville Primary School, we hold high expectations for all our young learners. Our teachers work in teams to make sure that all students are extended. Students are challenged and given opportunities to apply their learning in different contexts. Students who require additional time and support are assisted by a team of teachers.

More importantly, we recognise that the early years of school are very important because they shape students' perceptions about school and themselves as learners. It is through providing a positive and comprehensive introduction to learning that we shape the future of our students as highly capable learners.
